

## 10-325A

*LandRover handsfree direct input harness*

InCarTec

10-325A is a harness designed to allow the fitting of a Parrot MKi handsfree kit to LandRover Freelander 2 (not vehicles with Alpine Premium audio system), Discovery 3 and Range Rover Sport cars.

It uses the original aux in and telephone input to seamlessly integrate the handsfree kit with the original audio system.

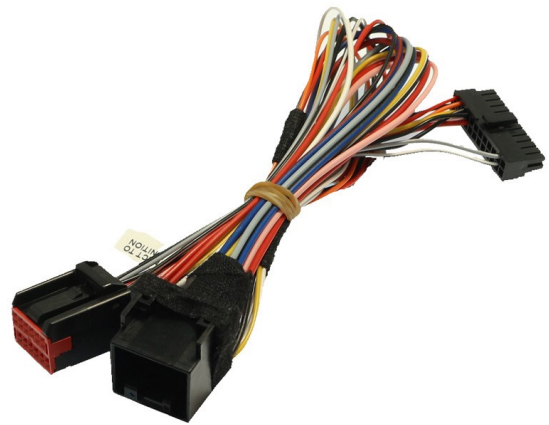

Fitting guide.

Disconnect the original head unit. Connect the 10-325A in line between the original connectors and the head

unit. Connect the 24 pin connector directly to the Parrot blue box, the original Parrot mute harness is not required.

Connect the black wire to a ground. Connect the red wire to a permanent power supply. Connect the orange wire to an ignition power supply, we recommend using the power from the cigarette lighter socket.

Set the original head unit to aux to listen to music streaming from the Parrot kit. Phone calls will use the cars original phone input feature which will automatically mute the radio and play the phone call through
