

24-520

Bluetooth audio receiver

InCarTec

24-520 is a universal Bluetooth audio receiver designed to add Bluetooth audio streaming to any car audio system that has an aux in function.

- Wireless Bluetooth 4.0 connection (A2DP, AVRCP, HFP, HID)
- Voltage: 10-16V DC, Draw: 20mA
- Waterproof module
- Turns on and off with ignition
- Automatically connects to the last paired device

Connect the black wire to ground, connect the red wire to a 12V ignition supply. The blue wire will give out a +12V feed when audio is being streamed.

Pairing. Search for a new device, connect to "VUBT2", no passcode is needed. The device will automatically connect to the last paired device when powered. If the last paired device cannot be found the 24-520 will go into pairing mode to connect to a new device.
