

## In Car Tec 29-009

Interface for Siemens VDO head-unit

**Important:** Siemens VDO/Dayton used two different connections for remote control.

These are on the green mini ISO connector C2:

### Notes

With some VDO Navigation systems you have to activate the “Steering wheel Remote Control” option in the system /setting menu of the head unit.

ALWAYS plug in the 29-009 adaptor cable to both the head-unit and the InCarTec control box, BEFORE switching on the ignition / audio head-unit.
