Fiat

500 2014>
500L
Ducato 2014>

Citroen

Relay 2014>

Peugeot

Boxer 2014>

Set the switches

The switches on the interface need to be set according to the brand of radio and vehicle model. Open the black box and set the switches.

See the tables below and right for the switch settings. Switches 1-4 relate to the brand of head unit and switches 5-8 are vehicle options. Try setting option 1 first, check that if the steering control are operating correctly and that the odometer is not flashing, if this is the case, try setting option 2.

Some cars may have a flashing odometer after installation, in this instance, try the other switch options for that type of car group.

Switch	1	2	3	4
Alpine	Off	On	Off	Off
Kenwood	On	On	Off	Off
JVC	Off	Off	On	Off
Clarion	Off	On	On	Off
Zenec	Off	Off	Off	On
Sony	On	Off	On	On
Pioneer	Off	On	On	On
Chinese/learning	On	Off	Off	On

5	6	7	8	Car model
On	On	On	Off	Setting option 1
On	Off	Off	On	Setting option 2
On	Off	On	Off	Setting for Ducato vans with original touchscreen radio. Allows time and date setting.

Set up the patch lead

Pioneer and Sony

Pin 1 black (base)
Pin 2 red (middle)
Pin 3 not connected

Chinese/Learning

Pin 1 blue (single wire)
Pin 2 not connected
Pin 3 not connected
Pin 4 blue (single wire)

The 4 pin patch lead connector diagrams above are viewed from the wire entry side of the connector.

LED STATUS

- 1 Green
- 2 Yellow

Green—CAN active

Yellow— Ignition output active

When connected the green light will indicate that the interface is recognising the vehicles CANbus, and the yellow light will indicate the interface is giving out an ignition power supply.

If the green light is not on check the CANbus connections and switch settings.

Setting time and date

Press *mute* and *track+* at the same time. The radio will turn off to show time setting mode is active.

Use volume + and - to set time and date, use track + and - to move through the menu.

Press *mute* and *track+* together again to exit time setting mode.
