

27-230

Add Camera to Honda 2VNO Navigation head-unit

Installation diagram

HONDA 2VNO HEAD UNIT

Installation Instructions

1. Ensure the vehicle's ignition is off and the key has been removed.
2. Remove the original Head Unit with reference to the manufacturer's instructions and connect 27-230 to the Head unit and to the camera via the yellow phono connector.
3. Ensure the black ground wire is appropriately connected to a vehicle ground point.
4. Wire in the new aftermarket camera using the reverse light feed to power the camera
5. Test the camera fully once it has been installed before re-installing the Head Unit
