Quadlock CANbus steering control interface for Vauxhall Corsa D.

Interface features

Ignition output	
Illumination output	
Reverse gear output	Purple wire
Speed pulse output	Pink wire
Parking brake output	Green wire
Mute	Yellow/black

Installation instructions

This interface has a loose white/yellow wire that needs to be connected to the LAN bus wire at the back of the display screen.

First, remove the grill on the top of the dashboard.

Unscrew the screw holding the display housing to the dashboard

Using a panel removal tool, unclip and lift off the display cover.

Connect the white/yellow wire to the green LAN bus wire at the back of the display.
